DESIGNS—Terminal Letters.

The Terminal Letters refer only to the pattern or design:

Terminal **A**, Arcadia Design. Terminal **E**, Ekado Design. Terminal **P**, Plain Bronze Metal.

FINISHES—Prefixed Letters.

Bronze Metal Goods.

The standard finish is the Natural Light Bronze, Highly Polished, and is without a prefixed letter; other finishes are designated by prefixed letters as follows:

A	(Prefixed)	Antique or Statuary Dark Bronze.
AB	"	Antique Copper.
AS	"	Antique Silver.
C	"	Chocolate Background. Raised Surface in Polished Natural Color.
D	"	Nickel " " " " " " "
E	"	Sage Green " " " " " " "
L	"	Lined on Highly Polished Plain Bronze Metal or Brass.
M	"	(Imperial) Black Background. Raised Surface in Pol'd Natural Color.
OS	"	Oxidized Silver on Plain Bronze Metal only. (Old **V** Finish.)
R	"	Terra-Cotta Background. Raised Surface in Polished Natural Color.

Plated Goods

Are designated by a prefixed letter as follows:

H	(Prefixed)	Hand Plated (Silver) on Bronze Metal or Brass.
N	"	Nickel Plated on Bronze Metal, Brass or Iron.
S	"	Electro-Silver Plated on Bronze Metal or Brass.

Iron Goods.

The standard finish for Ornamental Iron is our Berlin Bronzed and is without a prefixed letter; other finishes are designated by a prefixed letter as follows:

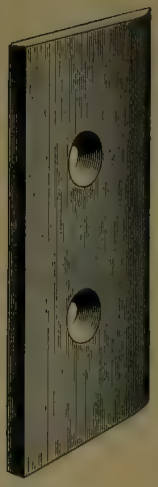

B	(Prefixed)	Copper Plated, Black Background, Polished Raised Surface.
K	"	"Tokio"—Bronze Plated (Light Color), Black Background, Polished Raised Surface.
P	"	Copper Plated.
T	"	Tuscan Bronzed.
Y	"	"Yeddo"—Bronze Plated (Light Color), Polished Raised Surface.

A Design Goods in Finishes A and M, without extra charge, as priced in Catalogue.
E Design Goods in Finishes A, C, E, M and R, without extra charge, as priced in Catalogue for C Finish.

Unless otherwise ordered, the Ekado Design Goods will be sent in the **C** Finish, and all other Bronze Metal Designs in the standard Natural Light Bronze. Any Finish desired not on the above list should be fully specified.

THE ONLY THREE-BOLT REVERSIBLE HOTEL LOCK.

Do not cut the Key Hole clear through the door but into one side only; the upper key hole always for the inside of door and the lower one for outside, as marked upon the Lock. (The Latch Bolt is reversible.) When the door is locked upon one side it cannot be unlocked from the other (as the key hole does not go through), neither can the outside bolt be turned while the inside bolt is locked.

Furnished in 5 sets of 60 each (or less), making 300 Locks all different, with Steel Bit Master Key to pass each set of 60.

Nickel-Plated Thumb Knob and Plate.

Lock Bolt Key.

TWO Night Keys.

For the numbers of Keys see the following page.

Improved "Eclipse" Door Springs and Checks.

Cut of the IMPROVED Eclipse Door Spring and Check with the Check applied to the Door.

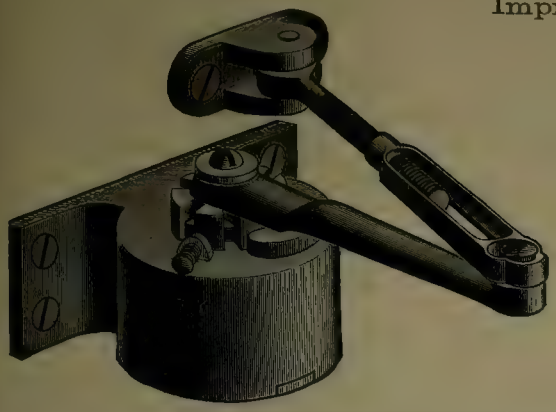

Cut of the IMPROVED Eclipse Door Spring and Check with the Check applied to the Casing.

New 289
Old 289 is void.

Patent "Eclipse" Door Springs.

Improved.

The Improved Eclipse has a Flat Spring instead of a Coiled Spring and is suitable for either Right or Left Hand Doors.

The Spring is adjustable tension, very compact and powerful, and is made from extra heavy clock-spring steel of the finest quality.

The power is greatest when the door is closed, and gradually decreases as the door opens. All parts are interchangeable, so that in case of breakage any part can be obtained at small expense.

To change the hand, simply withdraw the pin at the bottom of the case and turn the spring the other side up.

For applying the Improved Eclipse use the Template packed with each Spring and follow its directions carefully.

For what Doors suitable:	Tuscan Bronzed.		Enameled Bronze.		Nickel Plated.		Bronze Plated.

EXTRA SPRINGS (Springs only) for Repairs.

Nos.	**1251**	**1253**	**1255**	**1257**
Each (Springs only),	$0 25	30	40	50

All parts of Eclipse Springs and Checks are interchangeable, so that in case of breakage any part can be obtained at small expense, without returning the whole Spring or Check for repairs.

Patent "Eclipse" Door Checks.

Improved.

For applying to Door.

For applying to Casing.

All the Eclipse Door Checks are now packed with detachable feet, so that the same check can be applied to either the door or the casing, as desired. The detachable foot for attaching to the door is so arranged that the cylinder may be properly adjusted, in or out, to suit doors differently set in their frames. The set screw holds the cylinder firmly when adjusted.

For what Doors suitable:	Tuscan Bronzed.		Enameled Bronze.		Nickel Plated.		Bronze Plated.	
	Numbers.	Each.	Numbers.	Each.	Numbers.	Each.	Numbers.	Each.
Ordinary Doors, Diam. of Cylinder 1⅛ In.,	**1223**	$3 50	**1623**	$4 00	**1723**	$7 00	**Y1223**	$7 00

☞ HAVE THE CYLINDER INDOORS WHERE POSSIBLE. ☜

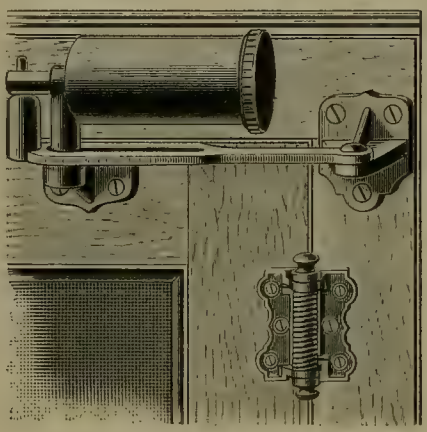

By screwing the cap at the end of the Cylinder the Check can be instantly varied for light or heavy draft.

4.89

See back of this sheet for SCREEN DOOR CHECKS.

Sargent & Co's

Patent "Chic" Screen-Door Check.

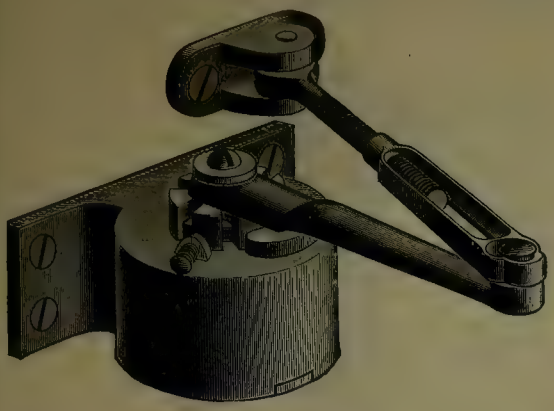

The "Chic" is suitable for either right or left hand Screen Doors without changing any of the parts; it is easily applied, and

CAN BE USED WITH ANY SCREEN DOOR SPRING OR SPRING HINGE.

The pressure acts toward the hinges and holds the door firmly in position. The piston is inclosed within the cylinder to prevent the summer dust from interfering with its free working. It effectually prevents slamming and can be placed on any Screen Door. By screwing the Cap at the end of Cylinder the Check can be instantly varied to suit the tension of the Door Spring or Spring Hinges that may be used.

No. 1200, Tuscan Bronzed, Packed with Screws, . . . each, $2 25

Improved "Eclipse" Door Springs.

The Improved Eclipse has a Flat Spring instead of a Coiled Spring and is suitable for either Right or Left Hand Doors.

The Spring is adjustable tension, very compact and powerful, and is made from extra heavy clock-spring steel of the finest quality.

The power is greatest when the door is closed, and gradually decreases as the door opens. All parts are interchangeable, so that in case of breakage any part can be obtained at small expense.

To change the hand, simply withdraw the pin at the bottom of the case and turn the spring the other side up.

For applying the Improved Eclipse use the Template packed with each Spring and follow its directions carefully.

DIRECTIONS FOR USING OUR PATENT COIL SPRINGS.

Put on the spring diagonally, with the top to the right in all cases. Screw on the top bracket first and as near the edge as possible. Screw on the bottom bracket, also near the edge. Put on the power with the wrench by turning the spring to the left, and slide down the collar when enough power is obtained.

No. 268, " No. 8 Mortise Latch,	8 15
No. 269, " No. 9 Surface Latch,	8 50

The peculiar construction of the pins forms a self-locking device which prevents the gate from getting off the hinges. Extensions from the lower hinge act as guides for centering the sockets upon the pins, thus insuring the return of the gate to a vertical position every time. With this Improved Hinge the Gate can swing both ways, it is self-shutting, and cannot get off the hinges. The same advantages apply to all the hinges on this page and on the following page.

Onesixth dozen sets in a box.

Two dozen sets in a case. No charge for cases when ordered in original packages.

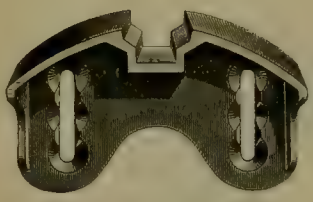

"Self-Lock" Gate Hinges—Swing Both Ways.

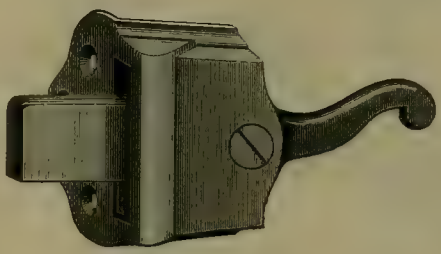

No. 204. Half Size Cut of Upper Hinge.

One dozen in a box.

Improved Neck Bolts.

This cut shows the manner of applying the Improved Neck Bolts illustrated below and on the following page. For fastening doors between rooms this Bolt is just what is wanted, and can be used to advantage anywhere in place of the old style Neck Bolt. The Bent Strike Plate makes a very neat finish and having screws at two angles gives great strength to the Bolt.

Open.

Showing position of Fastener when the door is open. Patented.

Closed. Whole length is 8 Inches.

Showing position of Fastener when the door is closed and bolted. Patented.

No. 148.

Bronze Metal, Packed with Screws.

Be particular to specify Right Hand or Left Hand, as wanted.

No. 148, 8 Inch, Bronze Metal, ... per dozen, $46 00

Half dozen in a box; we send 2-3 Right Hand, unless otherwise ordered.

This Door Fastener is a combination of a Door Bolt, fastening the door as securely as the ordinary door bolt, and a door Fastener, securing it partially open, against intruders. Occupying only the space of a common bolt, it has all the advantages of the Chain Door Fastener, and will not scar the edge of the door when open, nor mar the wood work in any way. It works automatically, locking the door securely as it is closed, and it is ornamental, compact and strong.

Shaw's Improved Patent Transom Lifters.

New Pattern.

Adjusted to LEFT HAND.

Hinged at the Bottom.

Hinged at the Top.

Swung on Centres. To pull down.

Swung on Centres. To push up.

Adjusted to RIGHT HAND.

The above cuts will show how to apply.

Notice that the Guides for the rod are placed so as to act as stops, preventing the rod from pulling out when the Transoms are open the full width.

With Shaw's Improved Lifters Transoms can be opened easily, and locked in any position desired. The same Lifter can be used equally well for all Transoms, whether

HINGED AT THE BOTTOM, HINGED AT THE TOP,

SWUNG ON CENTRES, TO PULL DOWN, or SWUNG ON CENTRES, TO PUSH UP.

It is also applicable for Transoms working vertically, and is suitable for either right or left hand without changing any of the parts. Simple in construction and easily applied.

Shaw's Patent Transom Lifters, Improved.

See preceding page for cuts.

Either Right or Left Hand and suitable for all Transoms.

COPPER FINISHED.

Full Cases of the Copper Finished are packed as follows:

Nos. 221 and 222, 3, 4 and 5 feet, 100 in a case.
No. 223, 3, 4 and 5 feet, 100 in a case; 6 ft., 50; 7 and 8 ft., 25.
No. 224, - - 4, 5 and 6 ft., 50 in a case; 7 and 8 ft., 25.
No. 225, - - - - 5, 6, 7 and 8 ft., 25 in a case.

A small charge made for the cases.

Patent Transom Lifters.

Adjusted to Right Hand.

"CRESCENT" Slide Lifter.

"Crescent."

Adapted for all Transoms, no matter how they may be hinged, but it is especially designed for Transoms hinged at the bottom when the ceiling is quite near the Transom.

The "Crescent" is made regularly in Copper Finish but will be furnished in Bronze Metal and Nickel Plated to order.

Lever.

Especially adapted for heavy transoms in Stores, Banks, Public Buildings, Etc. By the use of the Lever heavy transoms can be easily opened or closed without risk of falling and breaking the glass, and with the Fastening Device they can be securely locked in any position. The same Lifter is suitable for either Right or Left Hand.

Notice (as per cuts on page 606) that the Guides for the rod are placed so as to act as stops, preventing the rod from pulling out when the transoms are opened the full width.

Adjusted to Left Hand.

Cut of Lever.

Patent Wire Fence-Hooks.

Trade Mark.

Full Size Cut of No. 9 Fence Hook. Patented.

Many young trees upon which the fence wire is fastened with staples are destroyed annually by the wire chafing through the bark and into the tree.

These Hooks when screwed into the tree within a half inch of the bark, slide on the fence wires when the trees sway with the wind, and no damage is done.

No. 7. 3 Inch, No. 7 Wire (about 34 hooks to the lb.), ... per pound, $0 22
No. 9, 3 " No. 9 " " 51 " " . . . . . " 22

Packed 100 pounds in a keg.

Patent

Hanging Twine Boxes.

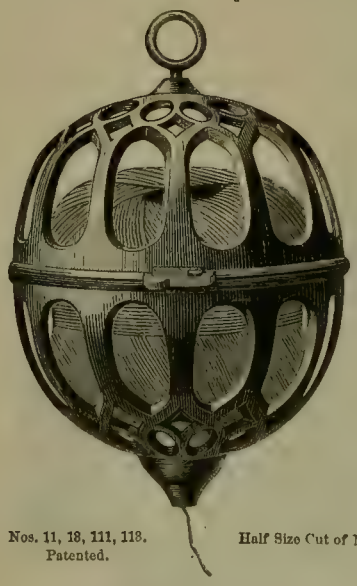

Gold Bronzed.

No. 7, Gold Bronzed, . . per dozen, $15 00

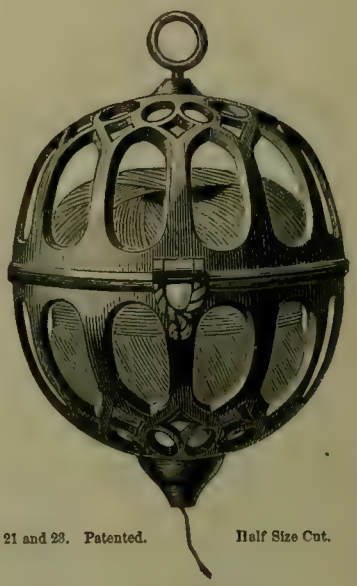

As the cord is pulled down the Twine Box is wound up on its axle to the highest point in the slide, and held there while in use. When the cord is released from use the box revolves to the lowest point in the slide, thus winding up several coils clear of the counter and out of the way, but always within easy reach. Especially adapted for light cord for Druggists, Grocers and General Stores.

Wind a few coils around the Box, as shown in the cut, before putting the cord through the twisted wire guide.

One-twelfth dozen in a box.

Nos. 11, 13, 111, 113. Patented. Half Size Cut of Nos. 11 and 13.

Nos. 21 and 23. Patented. Half Size Cut.

No. 21,	" " " 4 "	"	5 05
No. 21½,	" " " 4⅞ "	"	7 90

Double Spring, with Chain.

No. 22,	Spread of Jaw 4⅞ Inches,	per dozen,	$11 20
No. 23,	" " " 5½ " (with teeth),	"	15 00
No. 24,	" " " 6½ " " " "	"	18 00

Notice in the large cut above that when the Trap is set the catch and pan both lie inside the jaws, so that the animal cannot step on any part of the pan without being thrown into the trap. The Jaws are square in shape, giving a larger area within the trap than the old style. The ordinary trap is apt to break the bones of the leg, but in this Patent Trap the jaws are made with broad faces and hold the game securely without breaking the bone, avoiding the possibility of the animal escaping by gnawing off the leg. This Trap does away with the latch pin, and is self-setting; the jaw catches under the catch when the trap is pressed open, and is held with the slight setting which the little coil spring gives.

Morley Brothers'

Patent Railroad Step Ladders.

Hard Wood Ladders.

Anti-Friction Sheaves, Patent Rail Brackets, Round Edge Rail, &c.

PRICES ARE F. O. B. EAST SAGINAW, MICH.

Ladders,	Finished and Varnished, Complete with Anti-Friction Sheaves and Fenders,	each,	$15 00
Round Edge Rail,	$1\frac{3}{4} \times \frac{1}{2}$ inch, Jointed and Painted, ...	per foot,	30
Face Brackets,	For Flat Pilaster covering edge of Standard, ...	each,	50
Side Brackets,	For side of Standard, ...	"	65

Extra Charge for Crating Ladders and Boxing Rail and Brackets.

DIRECTIONS FOR ORDERING.

1st.—How many Ladders wanted.

2nd.—Length of Rail required, stating if in one or more continuous lines. Where the ends of rail are to be turned up, add 4 inches to each end, and state that same is included.

3rd.—Number of standards in each line of shelving and measurement between standards. A bracket should be used for every 5 or 6 feet of rail.

4th.—Face width of Pilasters, where used in front of standards. Where standards only are used, give thickness of same.

5th.—State if you have a flat surface of about 2 inches underneath the ledge; if so, will furnish with rolling fenders; otherwise sliding fenders to run on the edge of the ledge will be used.

6th.—Distance from floor to top of ledge.

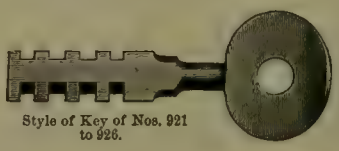

7th.—Distance from front of ledge to face of shelving.

8th.—Distance from top of ledge to top of Ladder Rail.

Can be made with 60 changes of keys. When ordered without Tubes, deduct **30 cents** from list prices.

Can be made for Cupboard when so ordered.

One dozen in a box.

Router Bit and Lock Routing Machine

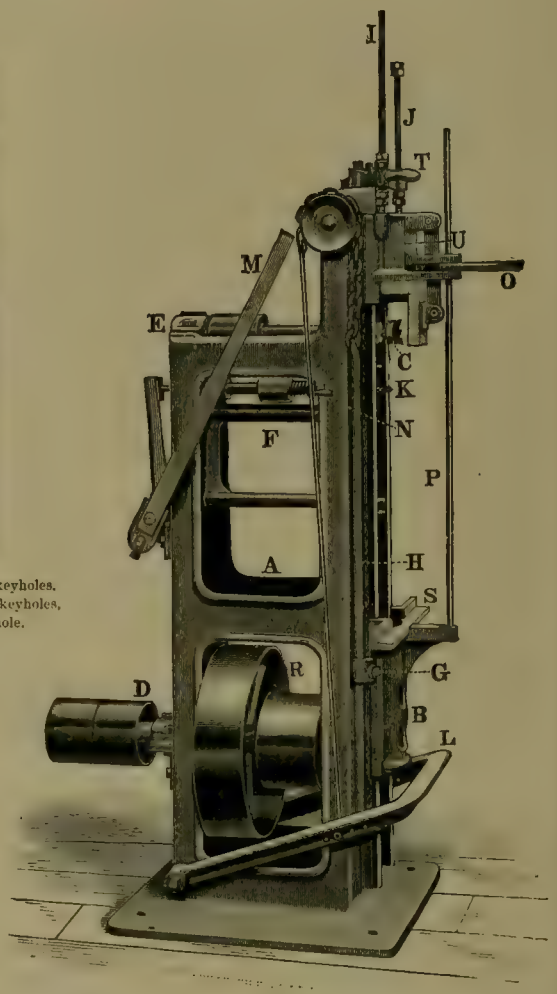

For Eagle Lock Co.'s "Duer" and "Acme" Locks.

"Duer" or "Acme" Router Bit.

Bit for cutting oblong keyholes. When wanted for round keyholes, state diameter of hole.

Routing Machine with Keyhole Attachment.

Occupies about 3 square feet of room.

Price, each, $75 00

This machine routs for the lock and cuts the keyhole, round or oblong, dispensing with all hand work. It is not at all a necessity to those who desire to use our locks, but is designed to meet the wants of large manufacturers.

In factories where the consumption of machine Locks is not sufficiently large to warrant the use of a separate machine the Iron Carriage and Gauge may be used to advantage, one person being enabled to cut 500 mortises per hour and fasten the Locks in place with the same celerity.

Router Bits.

For inserting "Duer" or "Acme" Locks without the use of Screws.

These Router Bits have knives which are easily sharpened without changing the shape of the mortise which they cut. They are made so that the pieces are interchangeable, and are so constructed that they will stand in any wood used in the manufacture of drawer fronts.

No. 1 Router Bit Mortises:

With No. 1 Cutters, for locks Nos. 1600 and 1601.
With No. 1½ " " " Nos. 1602 " 1603.

No. 2 Router Bit Mortises:

With No. 2 Cutters, for locks Nos. 1604 to 1620 inclusive.
With No. 2½ " " " Nos. 1622 to 1684 "

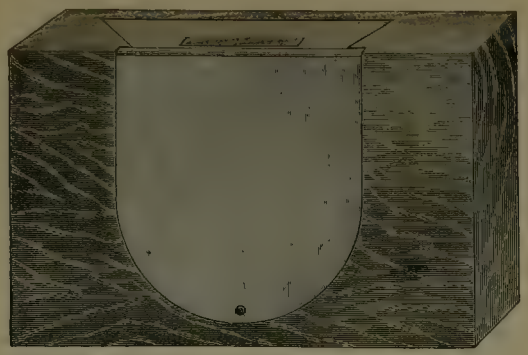

Above applies also to corresponding numbers of "Duer Locks," as shown on following page.

Router Bits, Complete with Cutter and Templet, .	each,	$4 00
Extra Cutters, for "Duer" or "Acme" Router Bits, .	"	35

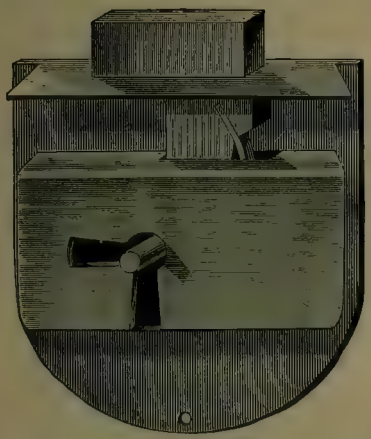

Iron Carriage and Gauge.

Iron Carriage and Gauge, ...	each,	$8 00

"Duer" and "Acme" Locks—No Screws.

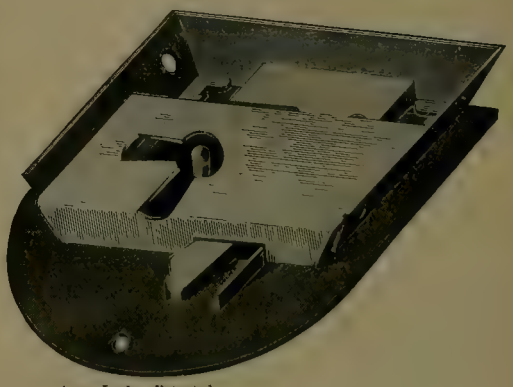

The above cut shows the Duer or Acme Lock inserted by the use of Router Bit and Carriage or Routing Machine shown on preceding page. No Screws required.

Duer Lock. Patented.

Acme Lock. Patented.

The list below gives the numbers of the regular locks, and the numbers of the corresponding "Duer" and "Acme" Locks. The price is the same for either the old numbers, or the "Duer," or the "Acme." See condensed list on pages 901 to 904 for prices.

Surface Trunk Locks.

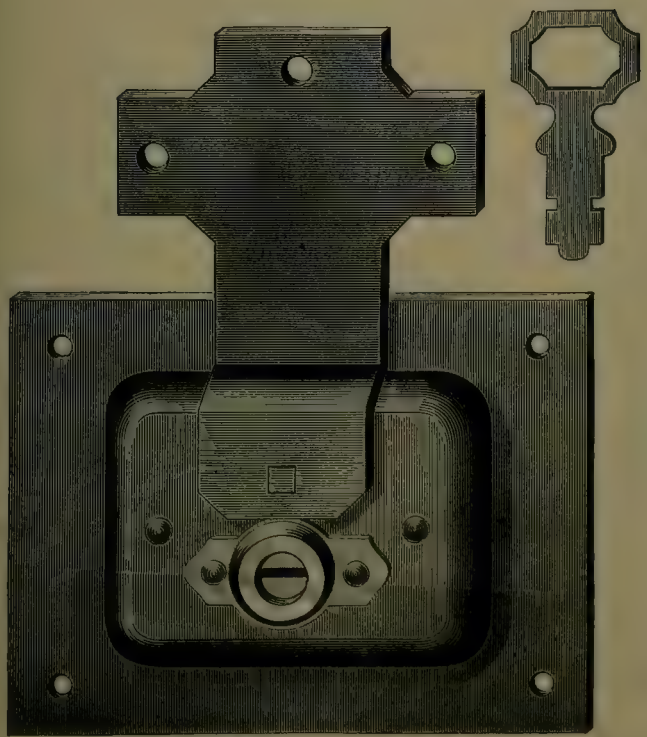

3 Inch. Full Size Cut of No. 115. Style of No. 125.

No Mortising Required.

Japanned.

Back Spring, Solid Key.

Nos.	Dozen.	Width.	Japanned.
115	$0 60	3 Inch.	Iron.
125	90	3½ "	"

8⅛ Inch. Full Size Cut of Nos. 117 and 119.

Japanned, Tin Bush.

Double Bitted Flat Steel Key.

Nos.	Dozen.	Width.	
117	$1 00	3½ Inch.	Japanned, Tin Bush.
119	1 50	3½ "	Tinned.

The above cuts represent new SURFACE Trunk Locks. They require no mortise cut in the Trunk to receive the lock work, thus retaining the whole strength of the wood in the trunk front. The Hasp is made of one piece of metal, which makes it much stronger, and is withdrawn from the Lock when raising the lid of the trunk.

One dozen in a package.

4 In.	16	16	16	16	17	18	18										

The above list is for Nails and Brads packed 1 lb. in a package; when packed otherwise, change list prices as below:

½ lb. papers, . Add 2 cents. | 25 lb. boxes, . Deduct 1 cent.
¼ lb. " . . Add 4 cents. | 100 lb. kegs, . Deduct 1 cent.

For either barbing, annealing, oval head or special point, add 1 cent to list prices.

For nails combining several specialties, add 1 cent for each specialty.

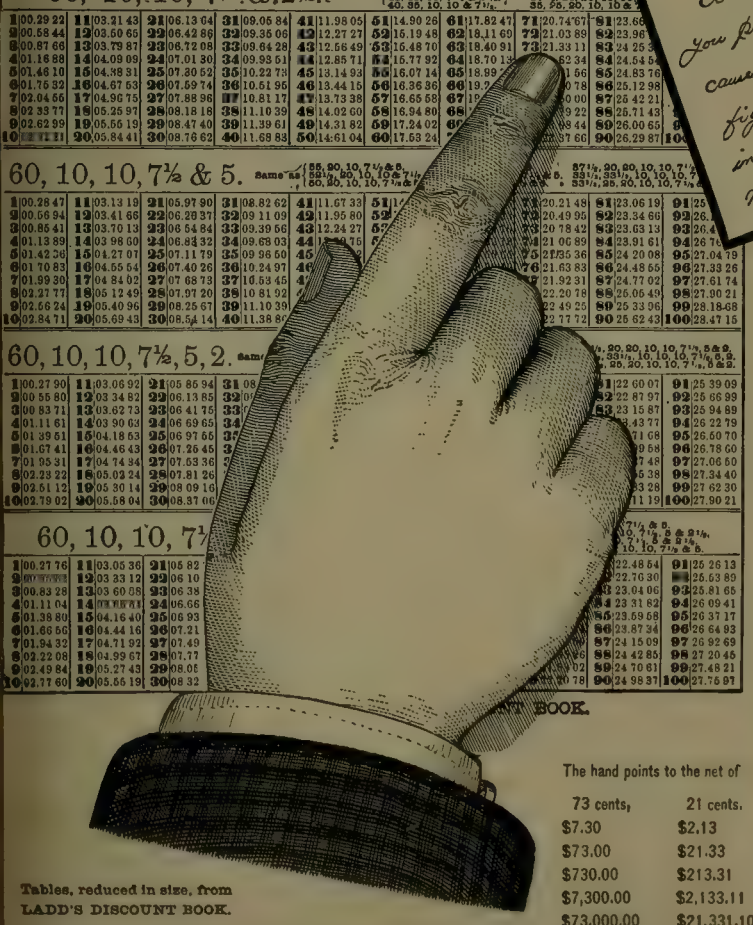

Ladd's Discount Book

Is indispensable to every one using percentage, as it is a practical means for rapidly reaching absolutely accurate results without the mental wear of computing, avoiding any possibility of error.

A few days' use will verify the claim that the book is accurate, rapid, convenient and practical.

The New Way.

Put Your Finger Right on it.

The hand points to the net of

73 cents,	21 cents.
$7.30	$2.13
$73.00	$21.33
$730.00	$213.31
$7,300.00	$2,133.11
$73,000.00	$21,331.10

Tables, reduced in size, from LADD'S DISCOUNT BOOK.

If the amount was, say $73.45, add the net of 45 cents, which the table shows is 13 cents, total net $21.46.

The Old Way

Net of —— $73.00 at

discount 60, 10, 10, 7½ + 2½ per cent.

73.00

60% — 43.80

10% — 29.20

10% — 2.92

7½% — 26.28

2½% — 2.628

23.65.2

1.77.39

21.87.81

11826

5913

17739

And You cannot feel sure of this till you prove it, after all your figuring, because it is so easy to make a mistake in figuring or misplace the figures as I did in working out the above example. The new way is Accurate, Rapid and Practical.

The full size of the book is 7¼×10 inches. The sample page herewith is reduced in size.

Accurate, Rapid, Convenient and Practical.

The Ellrich Grip.

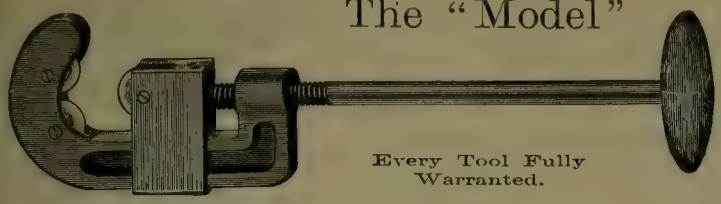

Tool Steel, Saw Tempered.

It is self-adjusting, has a quick grip, does not slip, lets go easily when necessary, will not crush pipe, works either to the right or left by simply turning over; can be used in many places impossible to other wrenches, as against partitions, &c. Used as an ordinary wrench it takes and holds readily any shape from round to square.

No. 1-2 G, Length 11 Inches, Weight 1 pound, takes pipe 0 to ⅜ Inch, ... each, $1 75
No. 1 G, " 15 " " 2¼ " " " ½ " 1 " . . . . . " 2 25

The "Model" Three-Wheel Pipe Cutter.

When ordering Saw Mandrels, send sketch and give distance from saw to end of Mandrel if the pulley is between the bearings. If the pulley is on the end of Mandrel, give distance from saw to inside edge of pulley. Also, whether the pulley is on the right or left hand side of Mandrel when saw is running towards you.

Our Mandrels are made with pulley on right hand side with left hand thread, unless otherwise ordered.

Steel Circumference Rules.

The Circumference Rule is used for obtaining circumference of circles by measuring their diameters. The divisions on lower edge of rule compare with those on upper edge as the circumference of a circle does to its diameter in inverse ratio. It is very useful to the workman, saving labor and errors.

PRICE PER DOZEN.

SHORT DOWEL BIT.

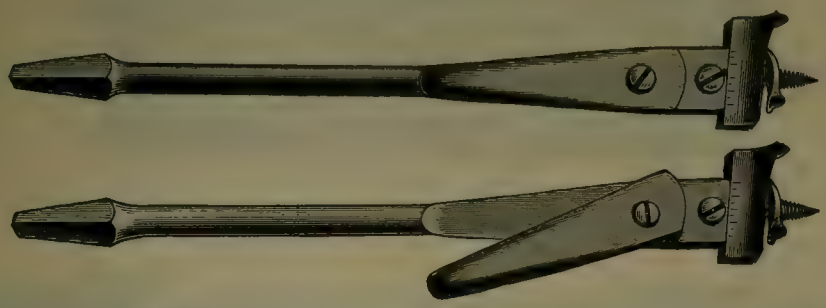

LONG DOWEL BIT.

Any half or medium sizes, not found in the above list, will be furnished at the price of the next regular size larger.
In ordering MACHINE BITS be particular to specify the Length of Twist, and Length and Diameter of Shank.
MACHINE BITS with Twist more than 6 inches will be charged at special prices.
HAND RAIL BITS, with very long points for boring at an angle, will be furnished at same price as Auger Bits.

PACKED: { AUGER BITS, 3 to 12-16, one dozen in a box; 13-16 and larger, half dozen.
DOWEL BITS, one dozen in a box. HAND RAIL BITS, half dozen in a box.
AUGERS, 6 to 14-16, half dozen in a box; 16-16 and larger, quarter dozen.

NOTICE.—"Russell Jennings" is stamped on the round of each Auger or Bit.

Excelsior Expansive Bits.

No Screw Driver required to adjust, the cutter being clamped by a lever cam.

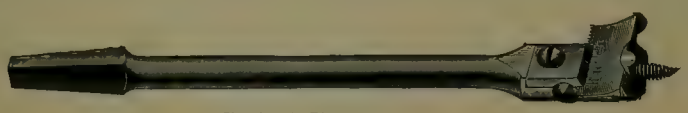

Bits Complete.		
	Small	Large
Cutting from	½ to 1½	⅞ to 3 in.
Per doz.,	$18 00	26 00

Cutters for Small Bits.		
Cutting from	½ to ⅞	⅞ to 1½ in.
Per doz.,	$3 00	3 75

Cutters for Large Bits.		
Cutting from	⅞ to 1¾	1¾ to 3 in.
Per doz.,	$5 25	6 00

The cutters for these Expansive Bits are made interchangeable with the cutters for the Clark Bit.

Steer's Patent Adjustable Extension Bits.

Showing the Bit with Cutter in place.

Showing the Bit with the Cutters off.

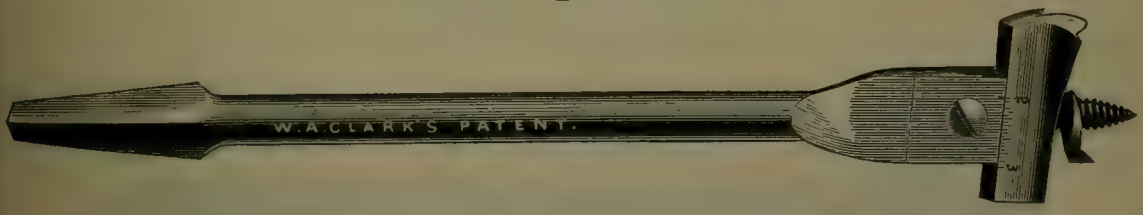

Bits Complete.		
	No. 1, Large	No. 2, Small
Cutting from	⅞ to 3	⅝ to 1¾ in.
Per doz.,	$26 00	18 00

Cutters for Small Bits.		
Nos.	1	2
Cutting from	⅝ to 1⅛	1⅛ to 1¾ in.
Per doz.,	$3 00	3 75

Cutters for Large Bits.			
Nos.	3	4	5
Cutting from	⅞ to 1⅝	1⅝ to 3	3 to 4 in.
Per doz.,	$5 25	6 00	12 00

Steer's Patent Bit will bore entirely through without chipping, lifting the wood out in one continuous scroll, and leaving the hole clean and sharp at both ends. The Cutter is easily adjusted and so firmly held that it cannot slip, thus securing the same diameter the entire depth of the boring. Every tool fully warranted.

Patent Adjustable Countersinks.

Full Size Cut.

Can be used on any size Bit up to ⅝ Inch.

By simply turning the screws to move the adjustable gauge, it can be set to countersink any desired depth and at the same time gauge the depth of hole to be bored.

Adjustable Countersinks (without Bits), . . per dozen, $3 60

One dozen in a box.

Garrett's Patent Auger Bit Gauge.

Nickel Plated.

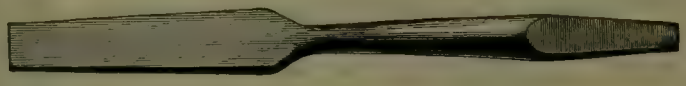

To gauge accurately the depth of holes to be bored while the friction wheel prevents defacing the work and allows the bit to revolve freely when the end of the gauge strikes the wood.

Easily adjusted to any size bit from $\frac{3}{16}$ to $\frac{7}{8}$ inch.

Garrett's Auger Bit Gauge, ... per dozen, $4 00

No. 4, " " " 4 " " . . . . . " 30 00

Langdon Adjustable Mitre Boxes.

Langdon.

New Langdon.

Each Mitre Box is accompanied by a Disston & Sons' No. 6 Saw of first quality, adjusted to size and varying from 12 inches long × 2 inches wide to 30 inches long × 6 inches wide under the back. Full directions with list of parts and prices of same accompany each Box sold.

Langdon.

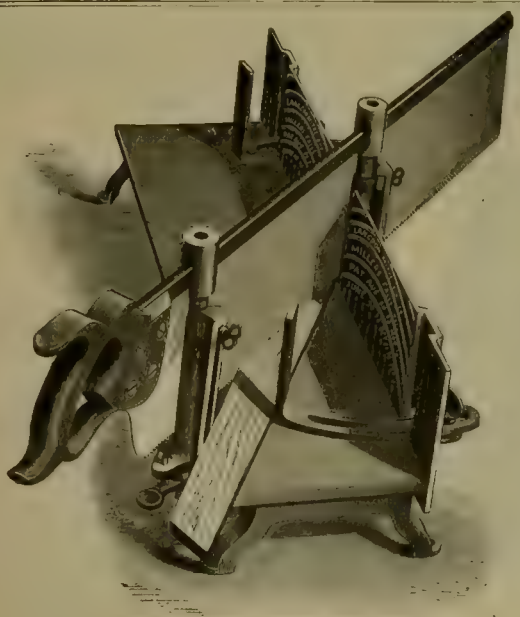

Nos.	Size.	Saw.	Capacity at Right Angles.	Capacity at Mitre.	Each.
1	1	18×4 In.	6 Inches width.	4 Inch width.	$9 00
5	1	20×4 "	6 " "	4 " "	9 50
6	1	22×4 "	6 " "	4 " "	10 00
7	1	24×4 "	6 " "	4 " "	10 50
8	1	26×4 "	6 " "	4 " "	11 00
9	2	22×4 "	9 " "	6½ " "	11 00
10	2	24×4 "	9 " "	6½ " "	11 50
11	2	26×4 "	9 " "	6½ " "	12 00
12	2½	28×5 "	9 " "	6½ " "	14 00

Langdon Angles are positive, viz.: right angles, 1-4, 1-6, 1-8 and the angles for the pitch of Window Stools.

New Langdon.

Nos.	Size.	Saw.	Capacity at Right Angles.	Capacity at Mitre.	Each.
16½	B	12×2 In.	. . . . .	. . . . .	$4 50
17	1	18×4 "	6 Inches width.	4 Inch width.	7 75
18	1	20×4 "	6 " "	4 " "	8 25
19	1	22×4 "	6 " "	4 " "	8 75
20	1	24×4 "	6 " "	4 " "	9 25
21	1	26×4 "	6 " "	4 " "	9 75
22	2	22×4 "	9 " "	6½ " "	9 75
23	2	24×4 "	9 " "	6½ " "	10 25
24	2	26×4 "	9 " "	6½ " "	10 75
25	2½	28×5 "	9 " "	6½ " "	12 00

New Langdon Angles are positive, same as the Langdon, *and in addition are* easily adjusted to any angle desired within the range of ordinary Mitre Boxes, viz.: Right Angle to 45 Degrees inclusive.

Improved Langdon and Improved New Langdon.

Improved Langdon.

Nos.	Size.	Saw.	Capacity at Right Angles.	Capacity at Mitre.	Each.
13	3	24×6 In.	12½ Inch width.	8½ Inch width.	$18 50
14	3	26×6 "	12½ " "	8½ " "	19 00
15	3	28×6 "	12½ " "	8½ " "	19 50
16	3	30×6 "	12½ " "	8½ " "	20 00

The Improved Langdon gives 88 degrees from right angles.

Improved New Langdon.

Nos.	Size.	Saw.	Capacity at Right Angles.	Capacity at Mitre.	Each.
26	1	18×4 In.	6 Inches width.	4 In. width.	$9 00
27	1	20×4 "	6 " "	4 " "	9 50
28	1	22×4 "	6 " "	4 " "	10 00
29	1	24×4 "	6 " "	4 " "	10 50
30	1	26×4 "	6 " "	4 " "	11 00
31	2	22×4 "	9 " "	6½ " "	11 00
32	2	24×4 "	9 " "	6½ " "	11 50
33	2	26×4 "	9 " "	6½ " "	12 00
34	2	28×5 "	9 " "	6½ " "	14 00

The New Langdon Improved has the *additional* feature of easy adjustment to *any possible angle desired* (by using the circular arms or guides), from right angles to 73 degrees on 2 1-2 inch stuff. It is the only Box manufactured adjustable for mitering circular work in patterns, emery wheels and segments of various kinds.

Gaston's "Prestoline."

A Liquid Metal Polish for cleaning and burnishing Copper, Brass, Bronze, Steel, Zinc, Tin, German Silver, Nickel, etc.

Half-Pint Cans.

Gaston's Prestoline, in half-pint cans, ... per dozen, $3 00

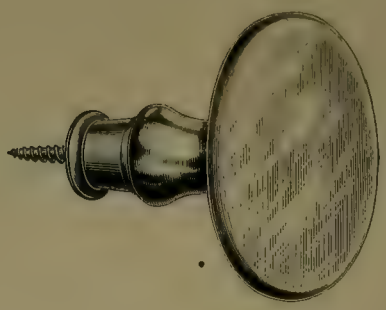

Full cases contain three dozen.

No charge for cases when ordered in original packages.

It is convenient and cleanly to use and wonderfully effective. It will clean metals with less labor than any preparation ever produced, giving a brilliant lustre which cannot be equaled, and which will last longer than any polish obtained by other means. It can be used equally well upon hot or cold metals and in any climate.

FURNISHED ALSO IN QUART, HALF GALLON AND GALLON CANS.

Phillips' Nippers, Nickel Plated, . . . per dozen, $12 00

Thomas' Automatic Police Nippers.

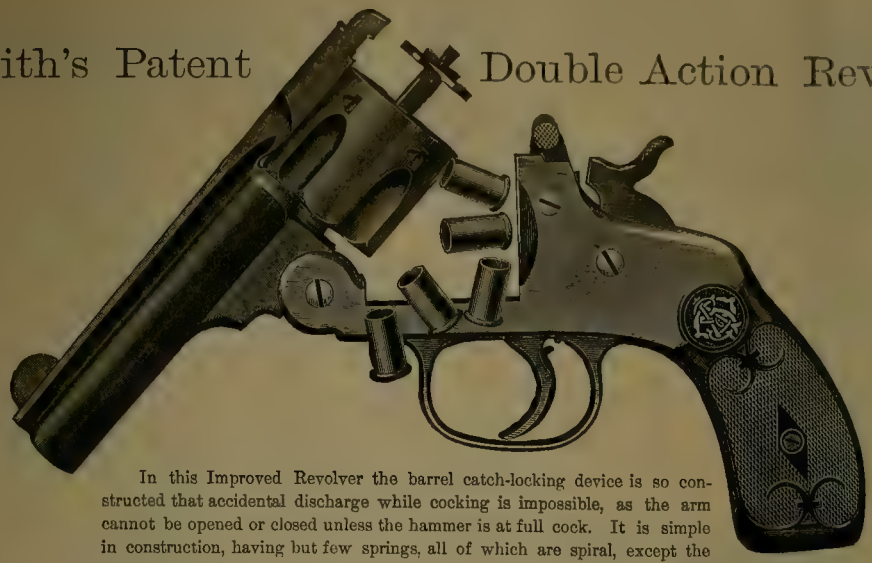

Putting the Nippers on the wrist brings the projecting piece shown in the centre of the cut in contact with the arm; a slight pressure carries it down flush, and automatically closes and locks the Nippers.

Thomas' Automatic Nippers, Nickel Plated, . per dozen, $24 00

Tower's Perfect Twisters.

Tower's Perfect Twisters, ... per dozen, $12 00

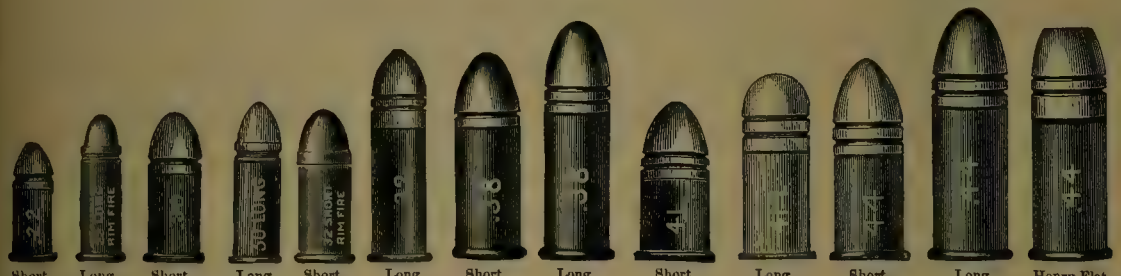

Smith's Patent Double Action Revolvers.

In this Improved Revolver the barrel catch-locking device is so constructed that accidental discharge while cocking is impossible, as the arm cannot be opened or closed unless the hammer is at full cock. It is simple in construction, having but few springs, all of which are spiral, except the main spring. Works with scarcely any friction and is easily and quickly taken apart, the only tool required being the small screw driver furnished with each revolver.

Model 1887, Shell-Ejecting Revolver, 38 calibre, ... each, $10 00
